

Skill Arena - Phase 1 Part 7

Treasury, CRM, Financial Ledger & Reconciliation Specification

Chapter 10 - Financial Philosophy

Every token must be traceable. Every balance must be reconcilable. Every liability must be backed. The platform must always be able to explain: - Where money came from - Where money went - Who owns it - Which reserve it belongs to

Treasury Architecture

Separate financial pools: 1. Player Funds Reserve 2. Platform Revenue Reserve 3. Season Fund Reserve 4. Championship Fund Reserve 5. Jackpot Fund Reserve 6. Emergency Reserve Funds may not be mixed without authorization.

Player Funds Reserve

Represents money belonging to players. Must always remain fully backed. Cannot be used for: - Operating expenses - Marketing - Development costs Player liabilities take priority.

Revenue Reserve

Platform income generated from: - PvP Fees - Tournament Fees - Premium Passes - Future Monetization Revenue tracked independently from player funds.

Season Fund Reserve

Used for: - Seasonal Rewards - Seasonal Championships - Seasonal Promotions Funded through predefined allocations.

Jackpot Reserve

Used for: - Progressive Jackpots - Special Events - Promotional Competitions Separate accounting required.

Emergency Reserve

Protects the platform against: - Unexpected liabilities - Payment delays - Financial disruptions Emergency reserve should never be exposed to normal operations.

CRM Overview

CRM acts as the financial control center. Tracks: - Players - Deposits - Withdrawals - Rewards - Fees - Liabilities - Treasury Balances

Token Ledger

Every token movement generates a ledger record. Fields: - Transaction ID - Timestamp - User - Amount - Source - Destination - Reference - Status Records are immutable.

Double Entry Accounting

Every transaction creates: Debit Entry Credit Entry Examples: Deposit: Bank +100 Player Wallet +100 PvP Entry: Player Wallet -10 Match Pot +10 PvP Win: Match Pot -18 Player Wallet +18

Deposit Processing

Workflow: 1. Payment Received 2. Provider Validation 3. Ledger Entry Created 4. Wallet Credited 5. Treasury Updated All steps logged.

Withdrawal Processing

Workflow: 1. Withdrawal Request 2. Qualification Check 3. Fraud Review 4. Ledger Validation 5. Treasury Validation 6. Payment Release All steps auditable.

Reconciliation Engine

System must continuously reconcile: Bank Accounts Payment Providers Player Wallets Treasury Funds Season Funds Jackpot Funds Differences generate alerts.

Audit Framework

Every action generates: - Financial Log - Security Log - Audit Log Logs retained permanently.

Treasury Monitoring Dashboard

Dashboard Displays: - Total Deposits - Total Withdrawals - Outstanding Liabilities - Revenue - Treasury Health - Season Funds - Jackpot Funds

Risk Controls

System prevents: - Negative Balances - Overpayment - Unfunded Rewards - Excessive Liability Treasury limits override gameplay rewards.

Compliance Support

Supports: - Financial Audits - Investor Reviews - Regulatory Reviews - Internal Investigations All data exportable.

Server Authority

Client never controls: - Balances - Deposits - Withdrawals - Ledger Entries - Reconciliation All financial operations occur server-side.
