

Skill Arena - Phase 2 Master Overview

Product & Platform Design Architecture

Purpose of Phase 2

Transform the business architecture from Phase 1 into a complete product architecture defining screens, workflows, navigation and user experiences.

Primary Objective

Design a scalable platform capable of supporting millions of users, multiple games, global expansion and future mobile applications.

Platform Areas

Public Platform, Player Platform and Administration Platform.

Public Platform

Landing pages, registration, login, games showcase, leaderboards, tournaments and marketing content.

Player Platform

Dashboard, Wallet, Play, House Challenges, Tournaments, Replays, Profile, Achievements and Settings.

Administration Platform

CRM, Treasury, Security Operations, Compliance Center, Reporting and Support Systems.

Document 1

Authentication, Registration, Verification, KYC, Onboarding and User Journey.

Document 2

Dashboard, Navigation Architecture, Widgets, Notifications and Quick Actions.

Document 3

Wallet, Store, Deposits, Withdrawals, Transaction History and Financial Experience.

Document 4

Game Lobby, Matchmaking, Challenge Selection, Queue Systems and Game Discovery.

Document 5

Live Gameplay Experience, PvP Arena, House Challenges, HUD Systems, Results and Replay Viewer.

Document 6

Tournament Center, Championships, Qualification Systems, Brackets and Spectator Experience.

Document 7

Profiles, Achievements, Legacy Progression, Hall of Fame and Trophy Cabinet.

Document 8

CRM Portal, Treasury Console, User Administration, Security Operations and Compliance Management.

Core Design Rules

Client Trust Level Zero. All critical logic server-side. Full auditability. Mobile-first design. Future game compatibility.

Expected Outcome

Provide Codex and development teams with a complete blueprint for every user-facing and administrative component before technical implementation begins.

Transition To Phase 3

Phase 3 defines treasury architecture, ledgers, reconciliation systems, reserve calculations, audit architecture and financial infrastructure.
