

Skill Arena - Phase 2 Document 2

Dashboard & Navigation System - Enterprise Product Specification

Document Purpose

Define the primary authenticated player experience, dashboard architecture, navigation structure, widgets, permissions, security controls and user workflows.

Business Objectives

Provide a central command center for every player. Increase engagement, improve retention and surface all important platform actions within three clicks.

Screen ID

PLAYER_DASHBOARD_001

User Roles

Standard Player, Verified Player, Premium Player, Founder, Tournament Participant, Moderator and Administrator.

Desktop Layout

Global Header, Left Navigation, Main Content Area, Right Activity Panel and Footer.

Mobile Layout

Bottom Navigation Bar, Compact Header, Swipeable Widgets and Mobile Notification Center.

Global Header Components

Logo, Search, Notifications, Wallet Summary, Profile Avatar, Quick Deposit and Settings Access.

Left Navigation

Home, Play, House Challenges, Tournaments, Leaderboards, Wallet, Profile, Achievements, Settings and Support.

Dashboard Widgets

Live Wallet, Demo Wallet, Current League, ELO Rating, Season Progress, House Reputation, Recent Matches, Active Tournaments and Notifications.

Quick Actions

Play Now, Join Tournament, Start House Challenge, Deposit Tokens, View Replays.

Season Widget

Current Season, Days Remaining, Season Rank, Season Points and Next Reward Milestone.

Tournament Widget

Upcoming Events, Registered Events, Qualification Status and Countdown Timers.

House Challenge Widget

Unlocked Tier, Reputation Score, Challenge History and Recommended Challenges.

Recent Match Widget

Last 10 Matches, Result, Entry Fee, Opponent, Duration and Replay Access.

Notification Center

Tournament Alerts, Security Alerts, Deposits, Withdrawals, Rewards, Season Updates and System Messages.

Profile Summary

Avatar, Username, Founder Status, Legacy Rank, Achievement Count and Trophy Count.

Data Sources

wallet_service, player_service, season_service, tournament_service, replay_service, notification_service and leaderboard_service.

Security Requirements

All balances, rankings, rewards and progression data are server-authoritative. Client receives read-only values.

Permission Controls

Menu visibility and feature access validated server-side. Hidden client controls do not grant access.

Performance Requirements

Initial load under 2 seconds, dashboard updates in real-time and supports mobile, tablet and desktop layouts.

Audit Requirements

Dashboard actions logged including deposits, withdrawals, tournament registrations, challenge entries and security events.

Acceptance Criteria

Player can identify balance, season status, next action and current progression within 10 seconds of login.
