

Skill Arena - Phase 2 Document 3

Wallet, Store & Financial Experience - Enterprise Product Specification

Document Purpose

Define the complete financial user experience including deposits, withdrawals, token purchases, transaction history, wallet management, store purchases and financial security.

Business Objectives

Provide a trusted, transparent and secure financial experience while maintaining complete treasury reconciliation.

Screen Group

WALLET_001, DEPOSIT_001, WITHDRAWAL_001, STORE_001, TRANSACTION_HISTORY_001.

Wallet Overview Screen

Displays Live Wallet Balance, Demo Wallet Balance, Pending Deposits, Pending Withdrawals, Available Balance and Account Status.

Live Wallet Component

Shows real-money token balance. Values calculated server-side only.

Demo Wallet Component

Displays practice tokens used for learning and training.

Deposit Screen

Allows player to purchase tokens using supported payment providers.

Minimum Deposit Rules

Minimum deposit: USD \$10. Equivalent to 100 Tokens.

Deposit Workflow

Wallet → Deposit → Select Amount → Payment Provider → Confirmation → Wallet Update.

Supported Payment Methods

Card Payments, Bank Transfers, Digital Wallets and future regional payment providers.

Deposit Security

Payment confirmation validated server-side before wallet crediting.

Withdrawal Screen

Allows eligible players to convert tokens back into real funds.

Minimum Withdrawal Rules

Minimum withdrawal: USD \$10 equivalent.

Withdrawal Qualification

Player must complete minimum live activity requirements. Withdrawal fee rules enforced automatically.

Withdrawal Workflow

Wallet → Withdraw → Validation → Compliance Check → Approval → Payout Processing.

Transaction History

Displays deposits, withdrawals, rewards, entry fees, tournament fees, winnings and adjustments.

Transaction Filters

Date Range, Transaction Type, Status, Amount and Reference Number.

Financial Statements

Players can download account statements and transaction summaries.

Store Overview

Digital store for cosmetics, season passes, founder items and future platform products.

Store Categories

Cosmetics, Profile Items, Titles, Borders, Seasonal Content, Founder Content and Future Marketplace Items.

Season Pass Purchase

Players may purchase premium season access directly through the store.

Reward Redemption

Tokens, rewards and promotional items redeemed through wallet-controlled transactions.

Treasury Integration

Every transaction generates a ledger record and reconciliation event.

Fraud Controls

Monitor unusual deposits, withdrawals, bonus abuse, multi-account activity and suspicious transaction patterns.

Security Requirements

Client Trust Level = Zero. Wallet balances, purchases and withdrawals are validated server-side.

Audit Requirements

Every financial event generates transaction logs, audit records and treasury records.

Performance Requirements

Wallet updates reflected in near real-time. Transaction history searchable and exportable.

Mobile Requirements

Full wallet, deposit and withdrawal functionality available on mobile devices.

Acceptance Criteria

Player can deposit, purchase, view history, withdraw and verify balances without contacting support.
