

Skill Arena - Phase 2 Document 4

Game Lobby, Matchmaking & Challenge Selection - Enterprise Product Specification

Document Purpose

Define how players discover games, select challenges, enter matchmaking queues and access tournaments, PvP and House Challenge content.

Business Objectives

Reduce friction between login and gameplay while ensuring fair matchmaking and sustainable competition.

Primary Screen Group

GAME_LOBBY_001, MATCHMAKING_001, HOUSE_SELECTION_001, TOURNAMENT_ENTRY_001.

Game Lobby Overview

Central hub where players select a game mode and review available activities.

Lobby Sections

Featured Game, Quick Play, House Challenges, Tournaments, Daily Events, Recommended Activities and News.

Featured Game Area

Maze Arena displayed as primary game. Future games added without redesigning the lobby.

Quick Play Section

One-click access to the player's most appropriate PvP queue based on league and rating.

PvP Entry Flow

Lobby → PvP → Queue Selection → Matchmaking → Match Confirmation → Match Start.

House Challenge Entry Flow

Lobby → House Challenges → Select Tier → View Requirements → Confirm Entry → Launch Challenge.

Tournament Entry Flow

Lobby → Tournament Center → Eligibility Check → Registration → Confirmation.

Matchmaking Objectives

Match players based on skill, progression, difficulty history, league and competitive balance.

Matchmaking Factors

ELO Rating, League, Win Rate, Difficulty Completed, House Reputation and Wallet Category.

Cross-League Challenges

Players may challenge higher leagues after accepting risk warnings and increased entry requirements.

Queue Categories

Bronze, Silver, Gold, Platinum, Diamond, Master, Grandmaster and Dynamic High Roller Arenas.

Challenge Selection Screen

Displays challenge requirements, entry cost, potential rewards, reputation impact and difficulty information.

Match Confirmation Screen

Shows opponent category, entry fee, platform fee, prize pool and challenge rules before entry.

Queue Monitoring

Displays queue time, estimated wait, current search status and cancellation option.

Recommended Activities Engine

Suggests challenges based on progression, unfinished goals, seasonal objectives and skill level.

Player Information Display

Current League, ELO Rating, XP Level, Legacy Rank, House Reputation and Wallet Balance.

Live Event Integration

Show active tournaments, seasonal events and limited-time challenges.

Security Requirements

Matchmaking decisions occur server-side only. Client receives queue status and display data.

Fraud Prevention

Prevent queue manipulation, rating abuse, match farming, collusion and automated challenge selection.

Performance Requirements

Lobby loads under 2 seconds and matchmaking updates in near real-time.

Mobile Requirements

Full game selection, matchmaking and challenge entry supported on mobile devices.

Audit Requirements

Every queue entry, match creation, challenge launch and tournament registration recorded.

Acceptance Criteria

Player can locate, understand and enter a desired activity within 30 seconds.
