

Skill Arena - Phase 2 Document 5

Live Gameplay Experience, PvP Arena, House Challenge Interface & Replay Integration

Document Purpose

Define the live gameplay experience, player interface, PvP arena layout, House Challenge layout, HUD systems, replay integration and post-match workflow.

Business Objectives

Create a competitive, fair and highly engaging gameplay experience while maintaining server-authoritative validation.

Primary Screens

LIVE_PVP_001, LIVE_HOUSE_001, MATCH_RESULTS_001, REPLAY_VIEWER_001.

Gameplay Philosophy

Skill-based gameplay with equal conditions, transparent outcomes and replay verification.

PvP Arena Layout

Main Maze Area, HUD Bar, Timer, Lives Counter, Progress Indicator, Opponent Progress Panel and Match Status Panel.

House Challenge Layout

Main Challenge Area, Difficulty Indicator, House Tier Indicator, Lives Counter, Progress Indicator and Dynamic Timer.

HUD Components

Match ID, Timer, Lives Remaining, Progress Percentage, Connection Status and Pause State.

Opponent Visibility Rules

Display progress percentage and status only. Exact route and position hidden to prevent copying.

Optional Spectator Preview

Pixelated delayed opponent feed may be shown for excitement without revealing solution paths.

Match Start Flow

Countdown → Challenge Load → Validation → Match Start.

Real-Time Validation

All movement, completion checks, timer validation and life deductions occur server-side.

Connection Monitoring

Server continuously monitors latency, disconnects and session validity.

Disconnect Handling

Match paused, screens blurred, waiting message displayed and recovery timer initiated.

Forfeit Handling

Failure to reconnect within permitted period results in automatic forfeit according to platform rules.

Challenge Completion

Server validates completion, records results and calculates rewards.

Match Results Screen

Displays outcome, rewards, ranking impact, XP earned, reputation changes and replay access.

Reward Presentation

Tokens, XP, achievements, season points and reputation updates displayed after validation.

Replay Viewer Overview

Interactive replay system showing challenge history and recorded gameplay.

Replay Components

Playback Controls, Timeline, Match Statistics, Progress Graph and Outcome Summary.

Replay Access Rules

Players may view their historical matches. Administrative access governed by permissions.

Replay Security

Replay data generated server-side and protected by replay hashes and audit records.

Performance Requirements

Gameplay must remain responsive and synchronize in near real-time.

Mobile Requirements

Full gameplay experience supported on mobile devices with optimized controls.

Security Requirements

Client cannot determine wins, rewards, movement validation, challenge outcomes or replay generation.

Audit Requirements

Every action recorded including moves, disconnects, completions, rewards and replay generation.

Acceptance Criteria

Players can enter, complete, review and verify gameplay outcomes without external support.
