

Skill Arena - Phase 2 Document 8

CRM Portal, Treasury Console, User Administration, Security Operations & Compliance Center

Document Purpose

Define the internal operational systems used by administrators, finance teams, compliance officers, support staff and security personnel.

Business Objectives

Provide complete visibility into players, finances, security events, compliance workflows and operational health.

Primary Portals

CRM_001, TREASURY_001, USER_ADMIN_001, SECURITY_CENTER_001, COMPLIANCE_001, SUPPORT_001.

CRM Overview

Central management interface for player accounts, activity history, support actions and account administration.

CRM Components

Player Search, Account Overview, Activity Timeline, Wallet Summary, Match History, Support Notes and Risk Flags.

User Administration

Create, suspend, restrict, verify and review user accounts according to permission levels.

Player Profile Management

View player statistics, progression, KYC status, transaction history and account activity.

Treasury Console

Financial operations center showing reserves, liabilities, revenue and treasury health.

Treasury Components

Player Funds Reserve, Revenue Reserve, Season Funds, Jackpot Funds, Emergency Reserve and Reconciliation Status.

Financial Monitoring

Deposits, withdrawals, rewards, liabilities, pending transactions and treasury alerts.

Reconciliation Dashboard

Bank balances, provider balances, token liabilities and reconciliation exceptions.

Security Operations Center

Monitor authentication events, fraud indicators, suspicious activity and platform threats.

Security Components

Login Monitoring, Device Monitoring, Fraud Alerts, Replay Audits and Incident Management.

Fraud Review Center

Review suspicious deposits, withdrawals, multi-account activity, collusion and abuse reports.

Replay Administration

Search, review and audit match replays for dispute resolution and investigations.

Compliance Center

KYC management, AML monitoring, verification reviews and regulatory workflows.

KYC Workflow

Submission Review, Verification Decision, Escalation Process and Audit Logging.

AML Monitoring

Monitor transaction patterns, unusual activity and compliance risk indicators.

Support Operations

Support tickets, player communication, escalation management and dispute handling.

Reporting Center

Financial Reports, User Reports, Security Reports, Tournament Reports and Operational Reports.

Role Based Permissions

Administrator, Finance Officer, Compliance Officer, Security Officer, Moderator and Support Agent.

Audit Logging

Every administrative action recorded permanently with user, timestamp and reason.

Security Requirements

Administrative functions require elevated authentication and server-side authorization.

Performance Requirements

Operational dashboards update in near real-time and support large-scale player populations.

Mobile Requirements

Administrative access limited and role-controlled. Primary operation designed for desktop environments.

Acceptance Criteria

Authorized staff can manage users, finances, security events and compliance activities from a unified platform.
