

Skill Arena - Phase 3 Document 4

Payment Provider Integration, Deposits, Withdrawals, AML Controls & Financial Compliance Architecture

Document Purpose

Define how external payment providers integrate with the platform and how deposits, withdrawals, AML monitoring and compliance controls operate.

Business Objective

Provide secure global payment processing while maintaining compliance, fraud prevention and treasury integrity.

Payment Architecture

Payment Gateway Layer, Deposit Engine, Withdrawal Engine, Compliance Engine, AML Engine and Reconciliation Engine.

Supported Payment Methods

Card Payments, Bank Transfers, Digital Wallets, Regional Payment Providers and future integrations.

Provider Integration Model

All providers communicate through a centralized payment abstraction layer.

Deposit Workflow

Player Initiates Deposit → Provider Processing → Confirmation → Ledger Entry → Wallet Credit → Treasury Update.

Minimum Deposit Rules

Minimum deposit amount configurable by platform policy.

Deposit Verification

Deposits only credited after verified provider confirmation.

Withdrawal Workflow

Withdrawal Request → Eligibility Validation → AML Review → Treasury Validation → Provider Payout.

Withdrawal Eligibility

KYC completion, minimum activity requirements and compliance checks enforced before payout.

Withdrawal Controls

Daily limits, risk thresholds and reserve availability checks.

Payment Provider Records

Store transaction references, provider identifiers, statuses and reconciliation links.

AML Monitoring Framework

Monitor transaction volume, frequency, velocity, source patterns and unusual activity.

AML Risk Scoring

Each account receives a dynamic risk score based on financial behaviour.

Suspicious Activity Detection

Large deposits, rapid withdrawals, unusual patterns and high-risk behaviours generate alerts.

Compliance Review Workflow

Flag → Review → Escalation → Resolution → Audit Record.

KYC Integration

Identity verification status linked directly to payment permissions and withdrawal access.

Chargeback Management

Track disputes, provider notifications and treasury exposure.

Fraud Controls

Multi-account detection, payment abuse detection, bonus abuse monitoring and transaction analysis.

Geographic Controls

Country restrictions, payment method restrictions and jurisdiction-specific rules.

Financial Reporting

Deposit reports, withdrawal reports, AML reports, chargeback reports and provider performance reports.

Provider Monitoring

Track provider uptime, processing speed, success rates and failure rates.

Audit Architecture

All payment events permanently recorded with timestamps and traceability.

Security Requirements

Sensitive payment data tokenized and protected using secure infrastructure.

Compliance Requirements

Support KYC, AML, regulatory audits and financial investigations.

Acceptance Criteria

Platform can securely process deposits and withdrawals while maintaining compliance and full auditability.
