

Skill Arena - Phase 3 Document 6

Fraud Detection, Risk Management, Dispute Resolution & Financial Investigation Architecture

Document Purpose

Define the systems used to detect fraud, manage financial risk, investigate suspicious activity and resolve player disputes.

Business Objective

Protect players, treasury reserves and platform integrity while maintaining transparency and fairness.

Fraud Management Philosophy

Every financial event, match result and reward must be verifiable and auditable.

Core Systems

Fraud Detection Engine, Risk Scoring Engine, Investigation Center, Dispute Resolution Center and Case Management System.

Fraud Detection Engine

Continuously evaluates player activity, financial transactions and gameplay behaviour.

Risk Categories

Financial Fraud, Account Abuse, Collusion, Multi-Accounting, Bonus Abuse, Payment Abuse and Match Manipulation.

Risk Scoring Framework

Each account receives a dynamic risk score based on behaviour, transactions and activity patterns.

Financial Fraud Monitoring

Large deposits, rapid withdrawals, unusual transaction patterns and suspicious provider activity.

Account Abuse Detection

Shared devices, shared payment methods, suspicious registrations and account farming.

Collusion Detection

Repeated opponents, coordinated gameplay patterns and suspicious reward sharing.

Multi-Account Detection

Device fingerprinting, IP analysis, behavioural similarity and identity verification checks.

Bonus & Reward Abuse Detection

Repeated reward farming, exploit attempts and abnormal progression patterns.

Investigation Center

Centralized review system for fraud alerts, risk cases and escalations.

Case Management System

Case ID, Severity, Investigator, Status, Findings, Actions Taken and Resolution History.

Dispute Resolution Center

Allows review of player complaints, reward disputes, payment disputes and match disputes.

Replay Integration

Investigators can review replay records to validate gameplay-related disputes.

Financial Investigation Tools

Transaction tracing, ledger review, treasury verification and audit history review.

Escalation Framework

Low Risk, Medium Risk, High Risk and Critical Risk workflows.

Automated Actions

Temporary holds, withdrawal reviews, account restrictions and enhanced verification requests.

Manual Review Process

Investigators review evidence before final enforcement decisions.

Audit Requirements

All investigations, decisions and actions permanently logged.

Compliance Integration

Supports AML reviews, suspicious activity reports and regulatory investigations.

Reporting Framework

Fraud reports, risk reports, dispute reports and investigation outcome reports.

Security Requirements

Only authorized investigators may access fraud and dispute systems.

Performance Requirements

Fraud monitoring and alert generation operate continuously in near real-time.

Acceptance Criteria

Platform can detect, investigate, document and resolve suspicious activity while preserving auditability.
