

Skill Arena - Phase 7 Document 5

Competitive Integrity Master Engine, Reputation System, League Progression & Global Ranking Architecture

Document Purpose

Define the systems that determine player reputation, rankings, league placement, progression and competitive standing.

Business Objective

Create a fair and sustainable competitive ecosystem where skill is accurately measured and rewarded.

Core Philosophy

Rankings should reflect demonstrated skill, consistency, integrity and long-term performance.

Competitive Integrity Master Engine

Central authority responsible for evaluating player performance and competitive standing.

Player Reputation System

Every player receives a dynamic reputation score based on conduct, trust and competitive integrity.

Reputation Factors

Trust Score, Fair Play History, Verification Results, Tournament Conduct and Community Standing.

Reputation Impact

Influences tournament eligibility, challenge access and platform privileges.

Global Ranking System

Maintains worldwide rankings across all supported games and challenge categories.

Ranking Metrics

Skill Rating, Win Quality, Challenge Difficulty, Consistency and Verified Performance.

League Architecture

Players progress through structured competitive leagues based on performance.

League Examples

Bronze, Silver, Gold, Platinum, Diamond, Master and Elite divisions.

Promotion System

Players promoted after meeting defined performance thresholds.

Relegation System

Players may move to lower divisions after sustained underperformance.

Seasonal Rankings

Separate seasonal rankings reset at season boundaries while preserving historical achievements.

Lifetime Rankings

Permanent rankings tracking long-term competitive accomplishments.

Prestige System

Advanced progression layer recognizing long-term dedication and mastery.

Skill Validation Framework

Replay intelligence, challenge analytics and trust systems validate ranking legitimacy.

Leaderboard Integrity Controls

Prevent ranking manipulation, boosting and coordinated abuse.

Tournament Qualification Engine

Determine eligibility for regional, national and global championship events.

Elite Player Identification

Identify top performers using advanced performance and integrity metrics.

World Championship Framework

Structured qualification path from local competition to global championships.

Cross-Game Ranking Strategy

Support future multi-game rankings and ecosystem-wide prestige systems.

Reward Integration

Rankings and league progression connect to rewards, recognition and prestige systems.

Analytics Integration

Track ranking health, league balance and competitive ecosystem performance.

Monitoring Requirements

Continuously monitor ranking fairness, league health and progression quality.

Audit Requirements

Ranking calculations, promotions, relegations and championship qualifications permanently logged.

Future Expansion

Foundation for professional leagues, esports-style competition and global championships.

Acceptance Criteria

Platform accurately identifies skilled players while maintaining fairness, integrity and competitive motivation.
