

Skill Arena - Phase 8 Document 1

Complete Gameplay Flow Architecture & Player Journey Specification

Document Purpose

Define the complete player journey from account registration through competitive progression and long-term engagement.

Business Objective

Provide developers with a complete blueprint for how players interact with the platform.

Player Lifecycle

Visitor → Registered User → Verified Player → Competitive Player → League Competitor → Elite Competitor.

Step 1 - Landing Page

User visits platform and views game information, rankings, rewards and platform benefits.

Step 2 - Registration

User creates account using email verification and platform onboarding flow.

Step 3 - Identity Verification

Optional verification becomes progressively required for higher-value rewards and withdrawals.

Step 4 - Wallet Activation

User receives wallet profile and token account infrastructure.

Step 5 - Deposit Flow

User deposits funds through supported payment providers.

Step 6 - Token Conversion

Deposited funds converted into platform tokens at defined exchange rates.

Step 7 - First-Time Onboarding

User receives tutorials, practice access and platform orientation.

Step 8 - Practice Mode

Unlimited practice challenges available with no rewards and no risk.

Step 9 - Profile Creation

Player selects avatar, display profile and platform preferences.

Step 10 - Competitive Access

Player unlocks access to PvP challenges and ranking systems.

PvP Flow

Select Challenge → Entry Confirmation → Matchmaking → Maze Generation → Completion Verification → Prize Distribution.

PvP Match Lifecycle

Match Created → Match Accepted → Challenge Started → Replay Generated → Winner Calculated → Rewards Distributed.

House Challenge Flow

Select House Challenge → Eligibility Validation → Challenge Generation → Challenge Attempt → Verification → Reward Decision.

League Progression Flow

Performance updates rankings, XP, reputation scores and league placement.

Season Flow

Players compete throughout seasons for rewards, rankings and championship qualification.

Replay Flow

Completed challenges stored and available through replay center.

Leaderboard Flow

Player rankings update automatically after validated challenge completion.

Reward Flow

Rewards distributed through wallet and treasury infrastructure.

Marketplace Flow

Players may purchase cosmetics, premium items and future digital content.

Withdrawal Flow

Player requests withdrawal → Compliance Checks → Treasury Validation → Payment Processing.

Notification Flow

Platform communicates achievements, rewards, rankings and account activity.

Retention Loop

Practice → Compete → Progress → Earn → Improve → Compete Again.

Cross-Platform Support

Consistent experience across web, mobile and future client applications.

Monitoring Requirements

Track player progression, onboarding success, retention and engagement.

Acceptance Criteria

Developers can fully map and implement every player interaction within the platform.
