

Skill Arena - Phase 8 Document 3

PvP Match Specification, Match Lifecycle, Matchmaking Rules, Prize Distribution & Replay Architecture

Document Purpose

Define the complete PvP challenge experience from challenge creation to reward distribution.

Business Objective

Provide a fair, competitive and scalable player-versus-player ecosystem.

Core Philosophy

Both players compete on equal challenge conditions. Skill determines the outcome.

PvP Match Types

Ranked PvP, Casual PvP, Private Challenges and Tournament Matches.

Ranked PvP

Impacts rankings, reputation, leagues, XP and seasonal progression.

Casual PvP

No ranking impact. Designed for practice and social competition.

Private Challenges

Players may invite specific opponents and optionally configure stake values.

Tournament Matches

Controlled by tournament systems and championship qualification rules.

Match Creation

Player selects challenge type, entry amount and matchmaking preferences.

Entry Validation

Wallet balance, eligibility, reputation and compliance checks performed.

Entry Fee Collection

Entry fees deducted before matchmaking begins.

Platform Fee Model

Platform collects the defined PvP participation fee before prize pool formation.

Prize Pool Creation

Remaining value after platform fees becomes the challenge prize pool.

Matchmaking Engine

Players matched according to skill, reputation, league and challenge preferences.

Match Acceptance

Matched players receive confirmation before challenge initiation.

Maze Assignment

Both players receive the exact same generated maze instance.

Challenge Start

Challenge begins simultaneously for both participants.

Opponent Visibility

Opponent movement hidden. Optional blurred progress indicators may be shown.

No Timer Rule

Standard PvP matches have no timer and no life limitations.

Winner Determination

First verified completion wins the challenge.

Completion Validation

Server verifies completion before declaring match outcomes.

Tie Handling

Special tie resolution procedures apply if simultaneous completion occurs.

Replay Generation

Replay records generated for both participants.

Prize Distribution

Prize pool distributed automatically after validation and anti-cheat review.

Ranking Updates

Ranked matches update rankings, XP, reputation and league progress.

Abandonment Rules

Disconnected players enter protected pause states. Forfeiture rules apply if return windows expire.

Anti-Cheat Integration

Trust scores, replay intelligence and anti-bot systems participate in match validation.

Monitoring Requirements

Track completion times, abandonment rates, match quality and player satisfaction.

Acceptance Criteria

PvP competition remains fair, transparent, replayable and resistant to exploitation.
