

Skill Arena - Phase 8 Document 4

House Challenge Specification, House Tiers, Eligibility Rules, Payout Logic & Challenge Lifecycle Architecture

Document Purpose

Define the complete house challenge system including eligibility, progression, risk controls and reward structures.

Business Objective

Provide a sustainable challenge environment where players compete directly against the platform.

Core Philosophy

House challenges must be difficult, fair, verifiable and economically sustainable.

House Challenge Types

Bronze House, Silver House, Gold House, Platinum House, Elite House and Legend House.

Bronze House Tier

Entry-level house challenges designed for new competitive players.

Silver House Tier

Intermediate challenge category with increased difficulty and rewards.

Gold House Tier

Advanced challenge category requiring demonstrated player skill.

Platinum House Tier

High-difficulty challenge category with stricter eligibility requirements.

Elite House Tier

Top-tier competitive challenges designed for highly skilled players.

Legend House Tier

Highest challenge category with maximum complexity and exposure controls.

Eligibility Requirements

League, reputation, trust score, challenge history and progression requirements.

League Requirements

Players must reach specific league thresholds before unlocking higher house tiers.

Trust Score Requirements

Minimum trust scores required for participation in higher-value challenges.

Reputation Requirements

Player reputation contributes to challenge access decisions.

Challenge Entry Flow

Challenge Selection → Eligibility Validation → Entry Confirmation → Challenge Generation.

Challenge Generation

Maze Intelligence Engine generates a unique challenge for every attempt.

Timer Rules

House challenges use adaptive timers calculated through solver and calibration systems.

Lives System

House challenges use configurable life counts based on challenge category.

Adaptive House Probability

Target operating range remains approximately 60 to 70 percent house success rate.

Challenge Validation

Completion validated before rewards are considered.

Reward Calculation

Rewards determined by challenge category, difficulty score and treasury controls.

Treasury Protection Controls

Maximum payout limits enforced through treasury and risk engines.

Exposure Limits

Per-player, per-tier and platform-wide exposure restrictions apply.

Failure Handling

Challenge failure results in challenge completion without reward issuance.

Replay Generation

Every house challenge generates replay records for validation and analysis.

Anti-Cheat Integration

Trust scores, replay intelligence and verification systems participate in reward validation.

Progression Integration

Successful house challenges contribute to XP, reputation and progression systems.

Monitoring Requirements

Track challenge success rates, payout exposure, treasury risk and player performance.

Acceptance Criteria

House challenges remain engaging, fair, profitable and resistant to exploitation.
