

Skill Arena - Phase 8 Document 5

UI/UX Screen Blueprint, Navigation Architecture, Player Dashboard & Gameplay Interface Specification

Document Purpose

Define every major screen, navigation flow and user interaction within the Skill Arena platform.

Business Objective

Provide a simple, professional and scalable player experience across all devices.

Core Design Philosophy

Easy to learn, fast to navigate, competitive by design and mobile-first.

Main Navigation

Home, Play, House Challenges, Tournaments, Rankings, Wallet, Marketplace, Replays and Profile.

Home Dashboard

Player overview including rank, league, balance, XP, seasonal progress and quick actions.

Quick Actions

Play PvP, Challenge House, Deposit, Withdraw, View Rankings and Watch Replays.

Player Profile Screen

Avatar, statistics, trust score, reputation, achievements and progression history.

Wallet Screen

Token balances, deposits, withdrawals, transaction history and reward activity.

PvP Lobby Screen

Select ranked, casual, private or tournament matches.

Matchmaking Screen

Queue status, estimated wait time and match acceptance controls.

Gameplay Screen

Maze display, movement controls, challenge status and replay recording indicators.

House Challenge Hub

Display available house tiers, eligibility requirements and reward opportunities.

House Tier Screens

Bronze, Silver, Gold, Platinum, Elite and Legend challenge sections.

Boss Challenge Events

Special monthly and seasonal challenge events with limited participation opportunities.

Tournament Hub

Tournament listings, registrations, brackets and championship qualification information.

Rankings Screen

Global rankings, seasonal rankings, league standings and prestige leaderboards.

Replay Center

Replay library, match history, verification records and challenge analysis.

Marketplace Screen

Cosmetics, premium content, rewards and future digital products.

Notifications Center

Achievements, rewards, promotions, tournament reminders and security alerts.

Daily Calibration Screen

Daily skill calibration challenge access and performance history.

Settings Screen

Preferences, security settings, notifications and account management.

Mobile Design Principles

Large touch targets, responsive layouts and simplified navigation.

Accessibility Requirements

Support multiple devices, screen sizes and future accessibility improvements.

Security UX

Important financial and account actions require additional verification.

Performance Requirements

Fast loading screens, low latency interactions and responsive user feedback.

Acceptance Criteria

Users can easily navigate the platform and access all core features without confusion.
