

Skill Arena - Phase 8 Document 7

Administration Platform, Moderation Console, Investigation Center & Operational Control Specification

Document Purpose

Define the complete administration and moderation environment used to manage, monitor and protect the platform.

Business Objective

Provide operational teams with the tools required to maintain fairness, security and platform stability.

Core Philosophy

Every action must be traceable, auditable and role-controlled.

Administration Platform

Centralized control center for platform operations, player management and system monitoring.

Role-Based Access Control

Permissions assigned according to operational responsibility and least-privilege principles.

Admin Dashboard

High-level view of platform health, treasury status, player activity and risk indicators.

Moderation Console

Dedicated workspace for reviewing player reports, disputes and enforcement actions.

Player Management

View profiles, balances, rankings, reputation scores and account history.

Investigation Center

Central hub for fraud reviews, anti-bot investigations and trust score analysis.

Admin Replay Theater

Advanced replay review environment for moderation and investigations.

Replay Playback

Frame-by-frame replay inspection with challenge event timelines.

Route Heatmaps

Visual representation of player movement and route selection.

Click Analysis

Review player input timing, decision points and behavioral signals.

Completion Timeline

Detailed breakdown of challenge completion events.

Trust Score History

Historical trust score changes and supporting evidence.

Device Intelligence

View device history, device trust levels and account associations.

Verification History

Access verification challenges, results and supporting evidence.

House Exposure Monitoring

Track player impact on treasury exposure and challenge profitability.

Similar Player Analysis

Compare suspicious behavior against known patterns and player groups.

Fraud Investigation Workflow

Flag → Review → Evidence Collection → Decision → Enforcement → Audit.

Enforcement Tools

Warnings, restrictions, verification requests, reward holds and account suspension.

Treasury Control Center

Monitor reserves, liabilities, payouts and economic health indicators.

Tournament Administration

Manage tournaments, participants, brackets and championship events.

Support Center

Handle tickets, appeals, disputes and player assistance workflows.

Operational Monitoring

Monitor service health, performance metrics and infrastructure alerts.

Audit Logging

Every administrative action permanently recorded and attributable.

Compliance Controls

Support governance, financial reviews and regulatory requirements.

Acceptance Criteria

Operational teams can manage, investigate and protect the platform efficiently and securely.
