

Skill Arena - Phase 8 Document 8

Complete Maze Game Master Specification & Implementation Blueprint

Document Purpose

Provide the complete implementation blueprint for Version 1 of the Skill Arena Maze Game.

Business Objective

Deliver a fully defined product specification that developers can use to build the first production-ready game.

Core Philosophy

Skill determines outcomes. Every challenge is unique. Every reward is auditable. Every result is verifiable.

Player Journey

Registration, verification, wallet activation, practice mode, competitive play, progression and rewards.

Gameplay Foundation

Procedurally generated mazes powered by the Maze Intelligence Engine.

Difficulty Framework

Infinite difficulty scaling using difficulty scores rather than fixed levels.

Daily Calibration System

Unique daily calibration challenges used for player modelling and platform intelligence.

PvP System

Ranked, Casual, Private and Tournament challenge formats using identical maze assignments.

House Challenge System

Bronze, Silver, Gold, Platinum, Elite and Legend house challenge tiers.

Adaptive House Balancing

Target house success range of approximately 60 to 70 percent using AI calibration and performance modelling.

Lives & Timer Rules

Used primarily within house challenges and advanced challenge categories.

Reward Framework

Treasury-controlled reward issuance with sustainability protections.

Replay System

Every challenge generates replay records used for validation, disputes and intelligence.

Anti-Bot Integration

Behavioral analysis, trust scores, verification challenges and replay intelligence integration.

League System

Bronze through Elite league progression tied to skill, performance and integrity.

Ranking System

Seasonal rankings, lifetime rankings, prestige systems and championship qualification.

User Interface

Unified navigation, player dashboards, gameplay screens, rankings and wallet experiences.

Mobile Experience

Cross-platform mobile support with replay downloads and synchronized progression.

Marketplace Integration

Future-ready support for cosmetics, premium content and ecosystem expansion.

Administration Platform

Moderation tools, investigation center, replay theater and treasury controls.

Treasury Integration

Challenge rewards validated against treasury reserves and exposure limits.

Security Integration

Server-authoritative gameplay, anti-cheat systems and platform protection controls.

Scalability Objective

Support millions of players and future multi-game expansion.

Operational Intelligence

AI solvers, replay analytics, risk engines and performance calibration systems.

Success Criteria

Fair competition, sustainable economics, strong retention, secure operations and long-term scalability.

Strategic Outcome

Establish Skill Arena as a scalable skill-based competitive gaming platform and foundation for future games.
