

Phase 9 - Document 3

Dashboard UX and Game Hub Experience

Purpose

Define the primary user dashboard and overall game hub experience.

Dashboard Philosophy

Users must immediately understand where they are, what to do next and how they are progressing.

Welcome Banner

Displays username, league, rank and season information.

Player Overview Cards

Wallet Balance, Trust Score, League Points and Current Streak.

Continue Playing

Automatically presents the user's last active game and fastest route back into gameplay.

Featured Games

Highlights Maze Arena and future games with quick launch actions.

Daily Challenges

Daily Calibration, Daily Challenges and Weekly Challenges.

Season Center

Current season status, rewards preview and progression tracking.

Leaderboard Snapshot

Top ranked players and quick access to full rankings.

Event Banner

Boss events, seasonal events and special announcements.

News Center

Patch notes, updates, tournaments and platform announcements.

Sidebar Navigation

Persistent navigation for dashboard, games, wallet, replays and settings.

Mobile Dashboard

Optimized dashboard with quick access to games, challenges and wallet.

Localization

All dashboard elements must be language-aware and translation-driven.

Future Expansion

Supports clans, marketplace, streaming, coaching and additional games.

Success Criteria

Users can find a game in under 10 seconds and start playing in under 3 clicks.
