

Phase 9 - Document 7

Admin UX, Fraud Center, Treasury Center, Replay Theater and Operations Dashboard

Purpose

Define the enterprise administration platform used to operate Skill Arena.

Admin Philosophy

The admin platform should feel like enterprise banking and operations software rather than a game panel.

Admin Navigation

Dashboard, Users, Fraud Center, Treasury Center, Replay Theater, Support, Reports and System Health.

Operations Dashboard

Provides a real-time overview of users, challenges, treasury health, fraud alerts and withdrawals.

Executive Summary

Active Players, Challenge Volume, Treasury Coverage, Fraud Alerts and Pending Withdrawals.

Operations Feed

Real-time events such as withdrawals, fraud alerts, tournaments and system notifications.

User Management

Player profiles, trust scores, balances, verification status, devices and activity history.

Fraud Center

Suspicious accounts, risk levels, bot detection indicators and investigation queues.

Risk Levels

Green, Yellow, Orange and Red classification system.

Replay Theater

Replay review, route analysis, timeline inspection and challenge investigation.

Behavioral Analysis

Reaction times, movement patterns, human probability and bot probability scoring.

Trust Score Center

Trust history, risk factors, verification results and device confidence.

Treasury Center

Coverage ratio, reserve health, liabilities, reward obligations and withdrawals.

Withdrawal Review

Approval workflows, risk review and transaction verification.

Tournament Administration

Create, modify, pause, cancel and manage tournaments.

Support Center

Ticket management, escalation workflows and customer support operations.

Reports Center

Revenue, retention, treasury, fraud, tournaments and operational reporting.

System Health

API health, database health, queues, storage and service monitoring.

Alert Center

Critical incidents, outages, failures and operational alerts.

Role Based Access

Support Agent, Moderator, Fraud Analyst, Treasury Manager, Compliance Officer, Administrator and Executive.

Audit Logging

Every administrative action is logged with who, what, when and why.

Future Expansion

AI fraud detection, AI treasury forecasting, AI support and moderation systems.

Success Criteria

Administrators can investigate, review, monitor and operate the platform efficiently.
