

Phase 9 - Master Overview

Skill Arena UX, Design System & Frontend Experience Handbook

Purpose

Consolidated reference handbook covering all approved Phase 9 frontend, UX and design decisions.

Platform Philosophy

Competitive Human Skill Platform inspired by FACEIT, Chess.com and modern SaaS experiences.

Brand Identity

Shield + SA Monogram + Neural Path logo system with Arena Blue and Arena Purple color scheme.

Design System

Dark and Light themes, Inter typography, Space Grotesk headings and reusable component architecture.

Localization

Multi-language support from day one using translation-driven architecture.

Navigation Architecture

Public, Authenticated and Admin navigation structures designed for infinite expansion.

Dashboard Experience

Player progression, challenges, featured games, rankings and season tracking.

Maze Arena Experience

Ranked, Casual, House Challenges, Boss Events, Replay Center and Statistics.

Dual Maze PvP System

Player maze fully visible while opponent maze remains blurred with progress and moves remaining indicators.

Wallet Experience

Balances, rewards, deposits, withdrawals, treasury transparency and security.

Competitive Ecosystem

PvP, Rivals, Friends, Clans, Tournaments, Championships and Prestige systems.

Replay Ecosystem

Replay storage, route analysis, heatmaps, optimal route comparison and investigations.

Admin Experience

Fraud Center, Treasury Center, Replay Theater, Support and Operational Dashboards.

Frontend Architecture

Next.js, React, TypeScript, TailwindCSS, Zustand, TanStack Query and i18next.

Component Standards

Reusable, responsive, localized, accessible and theme-aware UI components.

API Integration

Dedicated service layer for authentication, wallet, maze, replay and tournament services.

Security Principles

Backend remains authoritative for balances, rewards, rankings and treasury values.

Mobile Experience

Full support across dashboard, gameplay, wallet, tournaments and administration alerts.

Accessibility

WCAG AA compliance with keyboard navigation and responsive design.

Future Expansion

Marketplace, AI coaching, streaming, guilds and additional game modules.

Phase 9 Completion

Documents 1 through 8 completed and consolidated into a unified frontend and UX strategy.

Success Criteria

Provide Codex and future development teams with a complete reference for frontend implementation.
