

Skill Arena - Big Picture Roadmap For Codex

Executive Overview of the Entire Platform Vision

What We Are Building

Skill Arena is not a single game. It is a global skill-gaming ecosystem designed to support multiple competitive games under a unified platform. Maze Arena is Game #1. Future games include: - Memory Arena - Logic Arena - Reflex Arena - Pattern Arena - Puzzle Arena All games share: - Wallets - Rankings - Seasons - Tournaments - Legacy System - Hall Of Fame - Security Framework - Treasury & CRM Systems

Core Mission

Build the world's leading skill-based gaming ecosystem where skill determines outcomes, all gameplay is verifiable, every token is auditable and long-term sustainability is prioritized.

Platform Principles

- Skill Determines Outcomes - Every Live Match Is Replayable - Every Token Is Auditable - Every Challenge Is Verifiable - No Reward May Exceed Treasury Reserves - Infinite Progression - Fair Seasonal Competition - Sustainable Growth - Server Authority Over Client Authority

Phase 1 - Business & Game Design

Completed. Defines: - Constitution - Economy - Wallets - PvP - House Challenges - Seasons - Tournaments - Treasury - Security - Governance

Phase 2 - Platform Design Specification

Design every screen and user flow. Includes: - Landing Page - Registration - Dashboard - Wallet - Store - Game Lobby - PvP Arena Screens - House Challenge Screens - Replay Viewer - Tournament Center - Leaderboards - Trophy Cabinet - CRM Portal - Admin Portal - Mobile Experience

Phase 3 - Treasury & CRM Specification

Design the financial backbone. Includes: - Token Ledger - Double Entry Accounting - Treasury Management - Reconciliation Engine - Audit Framework - Reserve Management - Financial Dashboards

Phase 4 - Security & Anti-Cheat Specification

Protect the ecosystem. Includes: - Authentication - Session Security - API Security - Anti-Bot Detection - Fraud Detection - Replay Verification - Match Fixing Detection - Platform Monitoring

Phase 5 - Technical Architecture

Design the system architecture. Includes: - Frontend Architecture - Backend Architecture - Databases - APIs - WebSockets - Cloud Infrastructure - Scaling Strategy - Monitoring

Phase 6 - Codex Build Blueprint

Convert all specifications into a build roadmap. Defines: - Build Order - Milestones - Database Schema - APIs - Services - Testing Strategy - Deployment Strategy

Long-Term Vision

Create a permanent ecosystem capable of supporting millions of players globally. Every future game must inherit: - Security - Treasury Rules - Seasons - Rankings - Replays - Governance - Auditability The platform should remain scalable, secure and sustainable for decades.
