

Skill Arena Recommended Technology Stack & Critical Development Rules

Recommended Stack

Frontend: Next.js + React + TypeScript. Mobile: React Native. Backend: Golang. AI Services: Python. Database: PostgreSQL. Cache: Redis. Storage: S3/MinIO. Infrastructure: Docker + Kubernetes.

Critical Rules

Client is zero trust. All rewards, rankings, balances, challenge outcomes and treasury calculations are server-side only.

Security

Use MFA, RBAC, audit logs, service authentication and encrypted communications.

Development Order

Build APIs, treasury and security first. UI follows stable backend services.
