

Skill Arena - Phase 6 Document 4

Marketplace, Creator Ecosystem, Partner Integrations & Future Revenue Architecture

Document Purpose

Define future platform monetization, creator tools, partner integrations and marketplace expansion opportunities.

Business Objective

Create diversified revenue streams while increasing player engagement and ecosystem growth.

Platform Vision

Evolve Skill Arena into a broader competitive gaming ecosystem with creators, partners and digital economies.

Marketplace Overview

Central marketplace for digital goods, cosmetics, seasonal content and future platform products.

Marketplace Categories

Cosmetics, Avatars, Themes, Profile Items, Seasonal Content, Founder Items and Future Collectibles.

Creator Ecosystem

Enable approved creators to contribute content, events and future experiences.

Creator Profiles

Dedicated creator identities with performance metrics and community engagement statistics.

Creator Revenue Model

Potential revenue sharing for approved marketplace contributions and events.

Tournament Partnerships

Allow strategic partners to sponsor tournaments, championships and seasonal events.

Brand Integrations

Support branded competitions, rewards and promotional campaigns.

Partner Framework

Standardized integration model for external partners and sponsors.

Affiliate Program

Reward referral activity and platform growth contributions.

Digital Goods Framework

Centralized inventory, ownership tracking and reward delivery systems.

Season Pass Expansion

Premium seasonal experiences, cosmetics and progression enhancements.

Reward Marketplace

Future redemption center for platform rewards and achievements.

Merchandise Integration

Potential future physical merchandise and branded product offerings.

Community Features

Creator spotlights, featured content, community events and engagement systems.

Revenue Architecture

Platform fees, premium subscriptions, seasonal content, sponsorships and marketplace activity.

Financial Controls

Treasury integration, revenue tracking and audit visibility across all monetization systems.

Analytics Integration

Track creator performance, marketplace activity and revenue metrics.

Compliance Requirements

Marketplace and partner activity governed by platform policies and compliance standards.

Security Requirements

Digital ownership, transaction integrity and marketplace protections.

Scalability Requirements

Support large creator ecosystems, partner networks and marketplace growth.

Future Expansion

Foundation for NFTs-free digital ownership systems, creator tools and ecosystem services.

Audit Requirements

Marketplace transactions, creator payouts and partner activities permanently logged.

Acceptance Criteria

Platform can expand beyond gameplay into a sustainable multi-revenue ecosystem.
